## Directions:

1. Turn to the template on the next page and stick foil tape over the gray lines.

**Note:** Apply the foil as a continuous piece, rather than separate pieces, even when turning corners. The adhesive on the bottom side of the foil makes a weak connection.

2. Fold the page corner along dotted line and place the battery "+" side-up over the "-" circle.

3. Fold the corner flap over, and clip the battery in place with a binder clip.

4. Stick the LED sticker onto the foil, over the footprint. The light will turn on!
