

How to fold the light strip into an “on” position

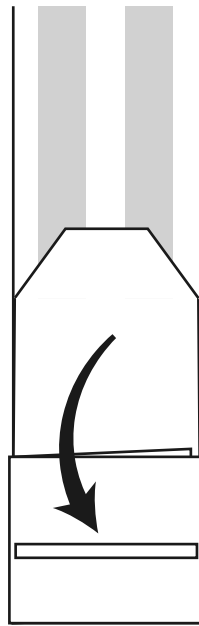

- 1** Fold the bottom tab up towards the battery

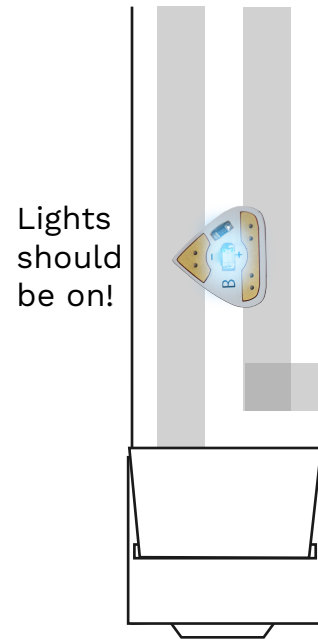

- 2** Fold the left tab towards the center

- 3** Fold the right tab (the one with the slot cut into it) towards the

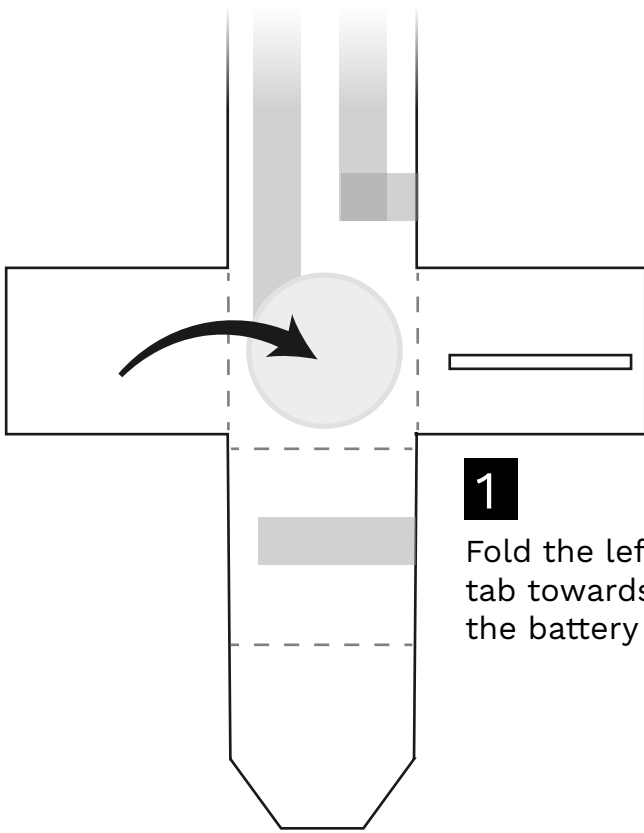

- 4** Fold the rest of the tab that's in the middle of the strip down

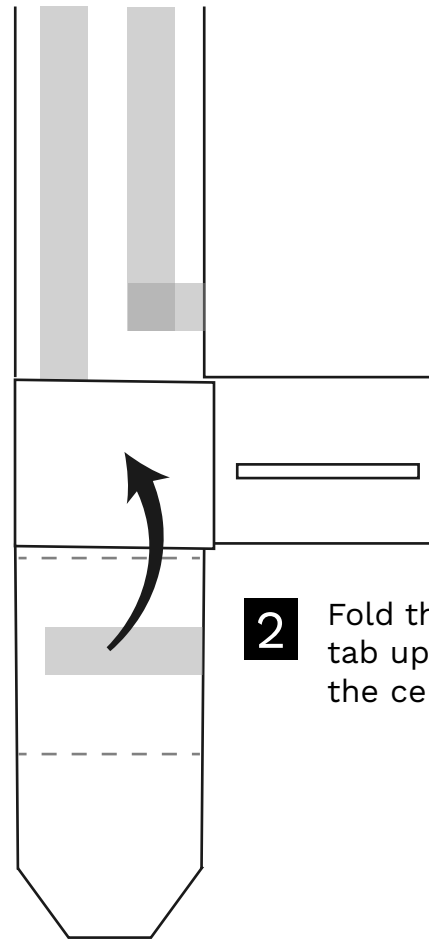

- 5** Tuck the tab through the slot to hold it in place.

Tip: You can add a small clip like a binder clip to the the bottom of the strip to hold the tabs together if needed.

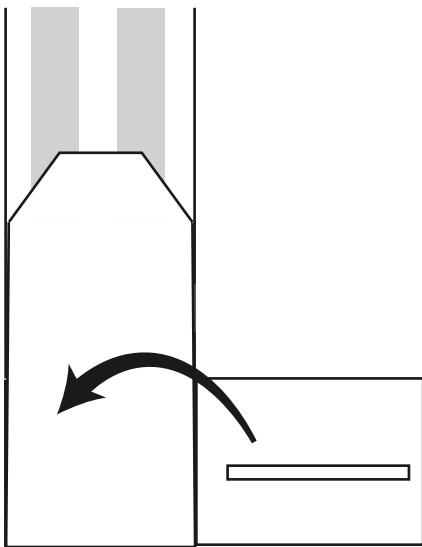

How to fold the light strip into an “off” position

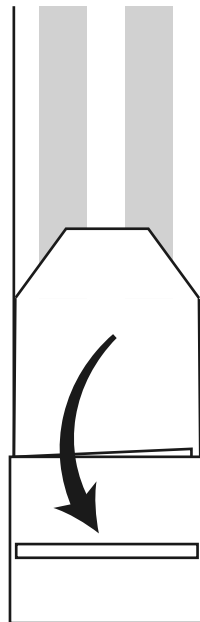

Fold the left tab towards the battery

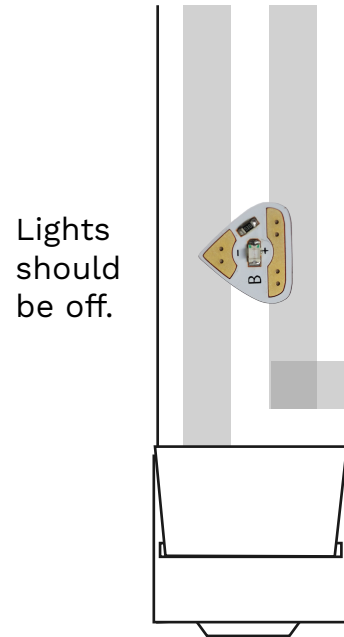

Fold the bottom tab up towards the center

Fold the right tab (the one with the slot cut into it) towards the

Fold the rest of the tab that's in the middle of the strip down

Tuck the tab through the slot to hold it in place.

Tip: You can add a small clip like a binder clip to the the bottom of the strip to hold the tabs together if needed.
